

## The “Sticky” Footer

A sticky footer is a footer that is always positioned at the bottom of a web page regardless of the amount of space taken up by content. There are several different techniques for achieving the same result; the solution below is one of the simplest. Place these rules at the top of your site’s CSS file.

```
html {
    position: relative;
    min-height: 100%;
}

body {
    /* Margin bottom matches footer height */
    margin-bottom: 60px;
}

.footer {
    position: absolute;
    bottom: 0;
    width: 100%;
    /* height of the footer */
    height: 60px;
}
```
